

24th – 26th May 2027, Berlin

Extrusion Coating and Lamination: Technologies at a Strategic Crossroads

Talk about the latest **technical insights!**

- Fundamental basics and groundbreaking innovations:
Key technologies to reliable processes and functionalities
- Technical implications of changing global supply chains:
Challenges from legislation to diversification
- Challenging dispersion coating and film-based Solutions:
Achieving economic goals with expertise in extrusion coating

Meet **technical experts** from the whole packaging supply chain!

- Supplying of raw materials
- Extruding
- Laminating
- Coating
- Forming
- Sealing
- Recycling

Contribute with **your expertise!**

- **Technical presentation** (25min): Present your solution, innovation, and research! Share and publish your ideas to your peers in the industry.
- **Poster**: Get into conversation with your colleagues about your topic.

SUBMIT your abstract until **30.09.2026!**
